CATALOG

“

DM Cell has found the answer in nature

“

With its innovative formulations and proven efficacy, DM.Cell has established itself as a leader in the professional skincare industry.
DM.Cell is a premium cosmetic brand that keeps your skin beautiful by putting nature, science, and medicine into your skin.
DM.Cell always pursues consistent skin with the same mindset 20 years ago when the active ingredients needed to be activated

DM.Cell Cosmetics, Inc. was founded in May 1999 by an Oriental medicine doctor and chemist. Through continuous research and product development, we have established ourselves as mentors for aesthetics and clinics both domestically and internationally. We produce products according to excellent quality standards that meet international regulations. With over 20 years of accumulated know-how and clinical data, our products are used by renowned dermatology hospitals and professional skin care salons worldwide. DM.Cell Cosmetics is a professional skin care cosmetics brand.

ECO PHOLOSOPHY

DM.Cell's products embrace naturalism by incorporating organic ingredients. Additionally, we do not test on animals.

BEST QUALITY

To compete, we will prioritize product efficacy while maintaining competitive pricing through a focus on direct sales channels, bypassing the inflation associated with traditional advertising and physical stores. We will target both professional dermatologists and the luxury market.

FUNCTION COSMETICS NO.1

Our company prioritizes using premium, irreplaceable ingredients while excluding harmful substances from the production process.

PATENT

It maintains the efficacy and freshness of the product through production and setting the expiration date through the fresh principle. BNP (Bio Nano Protein) was added to all raw materials to detoxify and neutralize harmful substances

DM.Cell Therapy :
A combination of
state-of-the-art
manufacturing methods
and high-efficiency
ingredients.

Actifirm T.S

The key to the effectiveness of DM.Cell products lies in their patented method, which utilizes unique, company-developed ingredients: hydrocotyl and cornflower extract.

Bionano Protein

DM.Cell's unique, patented nanoparticle protein delivery system penetrates the dermal layer and neutralizes free radicals.

Liposome Method

DM.Cell has developed this product using ionized water. It boasts four times higher oxygen permeability and contains selenium and germanium sourced from natural mines.

Germanium, Selenium Ionized Water

Germanium, Selenium Ionized Water

CERTIFICATE

MAIN INGREDIENTS

1. Paratox-25

A natural botox material. DM.Cell cultivate this Plant ingredient directly on Korean farms and extract high-concentration stem cells and extracts for use as raw materials in our cosmetics, It works like Botox, We registered it and called "Paratox-25"

2. D-Mela 12

Plant based the brightening agent, DM.Cell's patent.

3. Exo-Bio 72

The technology for isolating exosomes from stem cell culture fluids.

4. Peptide BB18-EX

A unique formula containing 18 active botanical ingredients.

5. MDI Comlex Marine Enzyme Therapy

MDI is a marine-derived enzyme, extracted and purified using a specialized preservation system that incorporates water-soluble electrolytes, including calcium, to maintain enzyme activity. This system helps stabilize the function of pores, capillaries, and inter-cellular networks.

6. Cytokinins N6-furfuryladenine Plant Growth Hormone

A cell division-promoting hormone factor, extracted from plants, enhances cell division and proliferation in skin cells.

7. NMN

Combats skin aging by suppressing the activity of genes associated with aging. It acts as a crucial component in activating cellular processes and DNA repair.

8. HairMax7

DM.cell has developed [or manufactures] a patented hair loss prevention ingredient. This formula blends seven powerful ingredients, including espino-zil and nettle extract.

9. Acmella Oleracea Extract

As a natural Botox alternative, Acmella extract helps firm sagging skin caused by a weakened collagen layer.

DM.Cell's History

● 2024

DM.Cell further expands its intellectual property portfolio with a patent in Japan for hair loss prevention ingredients and manufacturing methods containing nettle.

● 2021

DM.Cell's innovative spirit continues with the acquisition of patents for hair loss prevention ingredients and manufacturing methods utilizing nettle, as well as whitening cosmetic ingredients derived from natural extracts. The company also enters the US market by supplying products to Costco and obtains JFDA approval in Japan.

● 2020

DM.Cell achieves significant milestones: it secures a patent for anti-aging and whitening ingredients derived through supercritical extraction of natural complex extracts, and receives FDA approval in the USA.

● 2019

DM.Cell's commitment to quality is recognized with the Korea Quality Satisfaction Award in the Aesthetic Category.

● 2016

DM.Cell establishes a BBGLOW Training Center and secures a training agreement in Germany. Additionally, the company receives European cosmetic certification (CPNP).

● 2012

DM.Cell introduces Derma Brightening BBGLOW, a revolutionary product in the market.

● 2000

DM.Cell pioneers the production of stem cell peptide cosmetics, supplying this innovative line to dermatology clinics.

● 1998

DM.Cell is launched as a cosmeceutical brand. The company achieves ISO 22716 GMP certification and implements patented Actifirm T.S. and Liposome technologies in its products.

**For effective skincare,
DM.Cell Therapy utilizes the latest ingredients and
technologies available in modern cosmetic raw materials.**

CLEANSING

Cleansing works differently depending on your skin type, the type of skin troubles you have, the area of application, and the intended purpose. For safe and effective results, it is important to use products formulated with ingredients appropriate for the specific cause, condition, and skin characteristics. To achieve the clean and clear skin you desire, choosing the right cleansing product is the first step toward proper skincare. DM.Cell's cleansing line is designed with a variety of options tailored to different skin types. It is structured to allow easy and proper product selection based on professional consultation, ensuring effective and personalized skincare.

Vital Cleansing Lotion

It's a cleansing lotion that removes impurities from the skin without irritation with a soft texture, provides vitamins immediately for a brightening effect, neutralizes active oxygen, and prevents damage to the skin.

Application method	Take an appropriate amount of the product, rub gently along the skin texture to remove makeup, and wipe off with water.
Applied skin	Safflower Seed Oil, Allantoin, Chamomile, Rosehip Oil, Cucumber Extracts
Active Ingredients	For all skin types, even sensitive skin can be used
Volume	250ml / 1,000ml

DEEP
CLEANSING

O2 Bubble Purifying Cleanser

This non-problematic bubble wash will not strip your skin, thanks to its pH-balanced formula, but will still gently cleanse your complexion, removing impurities, grime, oil.

Application method Pump 2-3 times and apply evenly on the face. When oxygen bubbles form, gently roll to remove makeup, then rinse thoroughly with lukewarm water.

Active Ingredients Sodium Hyalunate, Squalane, Centella Asiatica Extract, Safflower Seed Extract

Applied skin For all skin

Volume 100ml

Aloe Skin Enhanser

This highly concentrated aloe vera, known for promoting blood circulation, decomposing toxic substances in the body, and boasting excellent antibacterial abilities, keeps uneven skin texture clear. Effective for sunburn or dry skin, it can be used as a pack base.

Application method After tidying up the skin texture with toner, take an appropriate amount of the product, apply it gently along the skin texture, and let it absorb lightly. You can also use it as a base for packs and modeling masks.

Active Ingredients Highly concentrated Aloe Sap, Panthenol, Marine Elastin, Witch Hazel, Pine Oil

Applied skin For all skin types, dry skin, sensitive skin

Double Enzyme Powder Cleanser

This super-soothing blend calms inflammation, leaving your skin clear and refreshed. The powder, formulated with lavender oil and kaolin clay, activates upon contact with water. Containing papain and bromelain enzymes, it micro-exfoliates dead skin cells, resulting in a smoother and brighter complexion. Simply mix the fine powder with a bit of water, and it transforms into a light foam.

Application method When washing your face, take an appropriate amount of the product on your wet palm, lather it up, rub your face gently as if massaging, and then rinse thoroughly with lukewarm water.

Active Ingredients Papain, Bromelain, Lavender, Kaolin

Applied skin All skin, thin and sensitive skin

Volume 60g

CREAM

The cream line, considered the crown jewel of scientific skincare, combines cutting-edge technology with the latest active ingredients to deliver the best possible results for your skin goals. As the skin's turnover time lengthens, its regenerative ability declines, accelerating aging. DM Cell's scientifically formulated active cream line, enriched with high concentrations of anti-aging ingredients like peptides, coenzyme Q10, and epidermal growth factors, boosts skin regeneration and promotes firm, resilient skin. DM Cell Skin Therapy is precisely tailored to skin types and concerns, offering expert-recommended, easy-to-follow usage for optimal care. This product line not only enhances beauty but also provides functional benefits, ensuring the highest satisfaction and visible results.

B.T.X Phyto Mucin Cream

Combining plant-derived mucin ingredients and the BTX complex, this cream is gently absorbed into the skin to care for wrinkles, improve elasticity, and maintain long-lasting moisturization. Additionally, it nurtures healthy skin while providing a smooth and even skin texture.

Application method After toning and applying essence to the skin, pump the Phyto-Mucin Cream twice and using your fingertips, gently massage the cream onto your face, starting from the center and moving outward. Utilize the "Mucin-Tap" massage technic to enhance skin elasticity.

Active Ingredients Phyto-Mucin, Glutathione, Acmeila, Acetyl Hexapeptide-8, Niacinamide

Applied skin For all skin types, skin lacking elasticity type

Volume 50ml

Having a desire to activate the active ingredient 20 years ago with that in mind, **DM.CELL**

DM.CELL is always developing a product with for consumers who wants an uniformly skin

EXOSOME ANTI-AGING TREATMENT

DM.^{fl}Cell

EXOSOME ANTI-AGING TREATMENT

Exosomes are nano-sized vesicles secreted for intercellular communication, playing a crucial role in influencing the cellular microenvironment. They are considered a next-generation therapeutic agent.

#Regeneration #Anti-inflammatory #BarrierStrengthening #PoreMinimizing #Radiance

DM.Cell's exosomes, developed through Ex-bio 72 technology that isolates and purifies exosomes at high purity from stem cell culture fluid, deliver the full potential of stem cells. **They effectively care for damaged skin and help activate the skin's natural energy.** Containing over 200 proteins related to anti-apoptosis and skin elasticity growth factors, these exosomes play a key role in intercellular communication, blood coagulation, and waste removal.

Changes in skin moisture levels over time

Increases elastin within skin cells

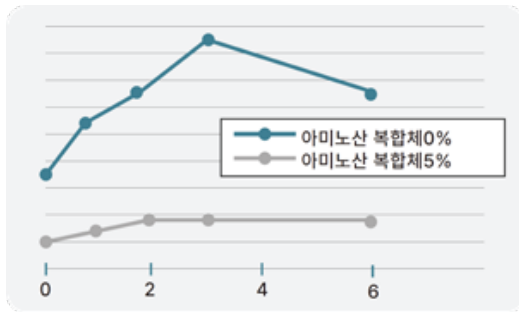

Increases collagen within skin cells

RE-INFORCE SYNERGY EXOSOME BOOSTER

Exosomes, the crystalline form of stem cells, are ingredients that effectively care for damaged skin and boost the skin's natural immunity. DM Cell's Exosome contains over 9 billion exosomes per ml, promoting skin regeneration and collagen production to enhance the skin's natural tone and radiance.

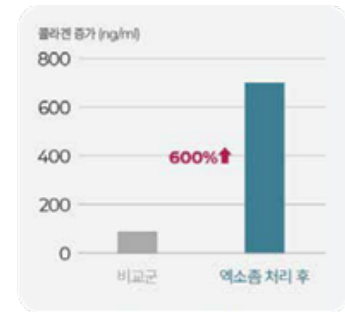

Application method	Pour the liquid exosome onto the dry exosome and leave it for about 3 minutes. After they are mixed together, apply it to the skin after cleansing and toning using MTS or fingertips.
Active Ingredients	10,000ppm exosomes, 1.5 million dalton hyaluronic acid, vitamins, minerals.
Applied skin	All skin types, weak immune skin, sensitive skin, damaged skin
Volume	Dry Exosome 100mg*5pcs / Solvent Exosome 5ml*5pcs

피부 세포 속 콜라겐 증가

EXOSOME ANTI-AGING TREATMENT

Traditional Skin Boosters vs Exosomes

DM.Cell exosomes are uniquely formulated to deliver both stem cells and nucleic acids, setting them apart from conventional ingredients. They help **regenerate damaged skin**, suppress inflammation, and activate cells, resulting in improvement that begins from the dermal layer.

19 Types of Amino Acids

5 Types of Growth Factors

3 Types of Peptides

Vitamins and Minerals

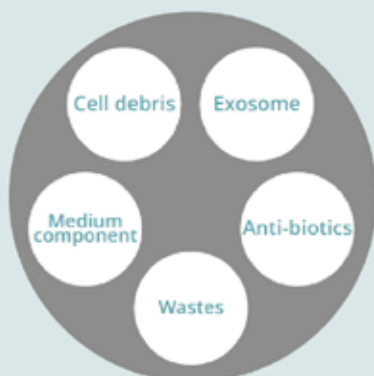

Tranexamic Acid

Low Molecular Weight Collagen

High-Purity Hyaluronic Acid

Stem Cell Culture Fluid vs Exosomes

Exosomes strengthen the fundamental vitality of the skin, targeting each layer from the epidermis to the subcutaneous fat layer, enhancing the skin's core power.

Stem Cell Culture Fluid

Exosomes

Program

EXOSOME ANTI-AGING TREATMENT

A 4th generation skin booster that extracts only the core ingredients of stem cells.

Enhance the fundamental vitality of your skin with care that starts at the cellular level!

**100% Pure
exosomes derived
from stem cells**

+

**600%
Collagen**

+

**300%
Elastin**

Anti-inflammatory effect

Improves sensitive skin, atopic dermatitis, and acne

Wound healing effect

Enhances skin regeneration abilities

Oil-water balance regulation

Hyaluronic acid, which enhances the content of natural NMF (Natural Moisturizing Factor), maintains optimal hydration with a molecular weight of 1.5 million Daltons

Pore tightening

Contains vitamin B, amino acids, and coenzyme Q10 to activate the skin's energy.

Activate collagen production

Stimulates fibroblasts to enhance collagen formation

Increased skin elasticity

Boosts skin elasticity by promoting the production of collagen and elastin

Anti-aging

Contains growth factors and 33 types of peptides that help activate fibroblast cells, which are essential for the basic structure of tissues

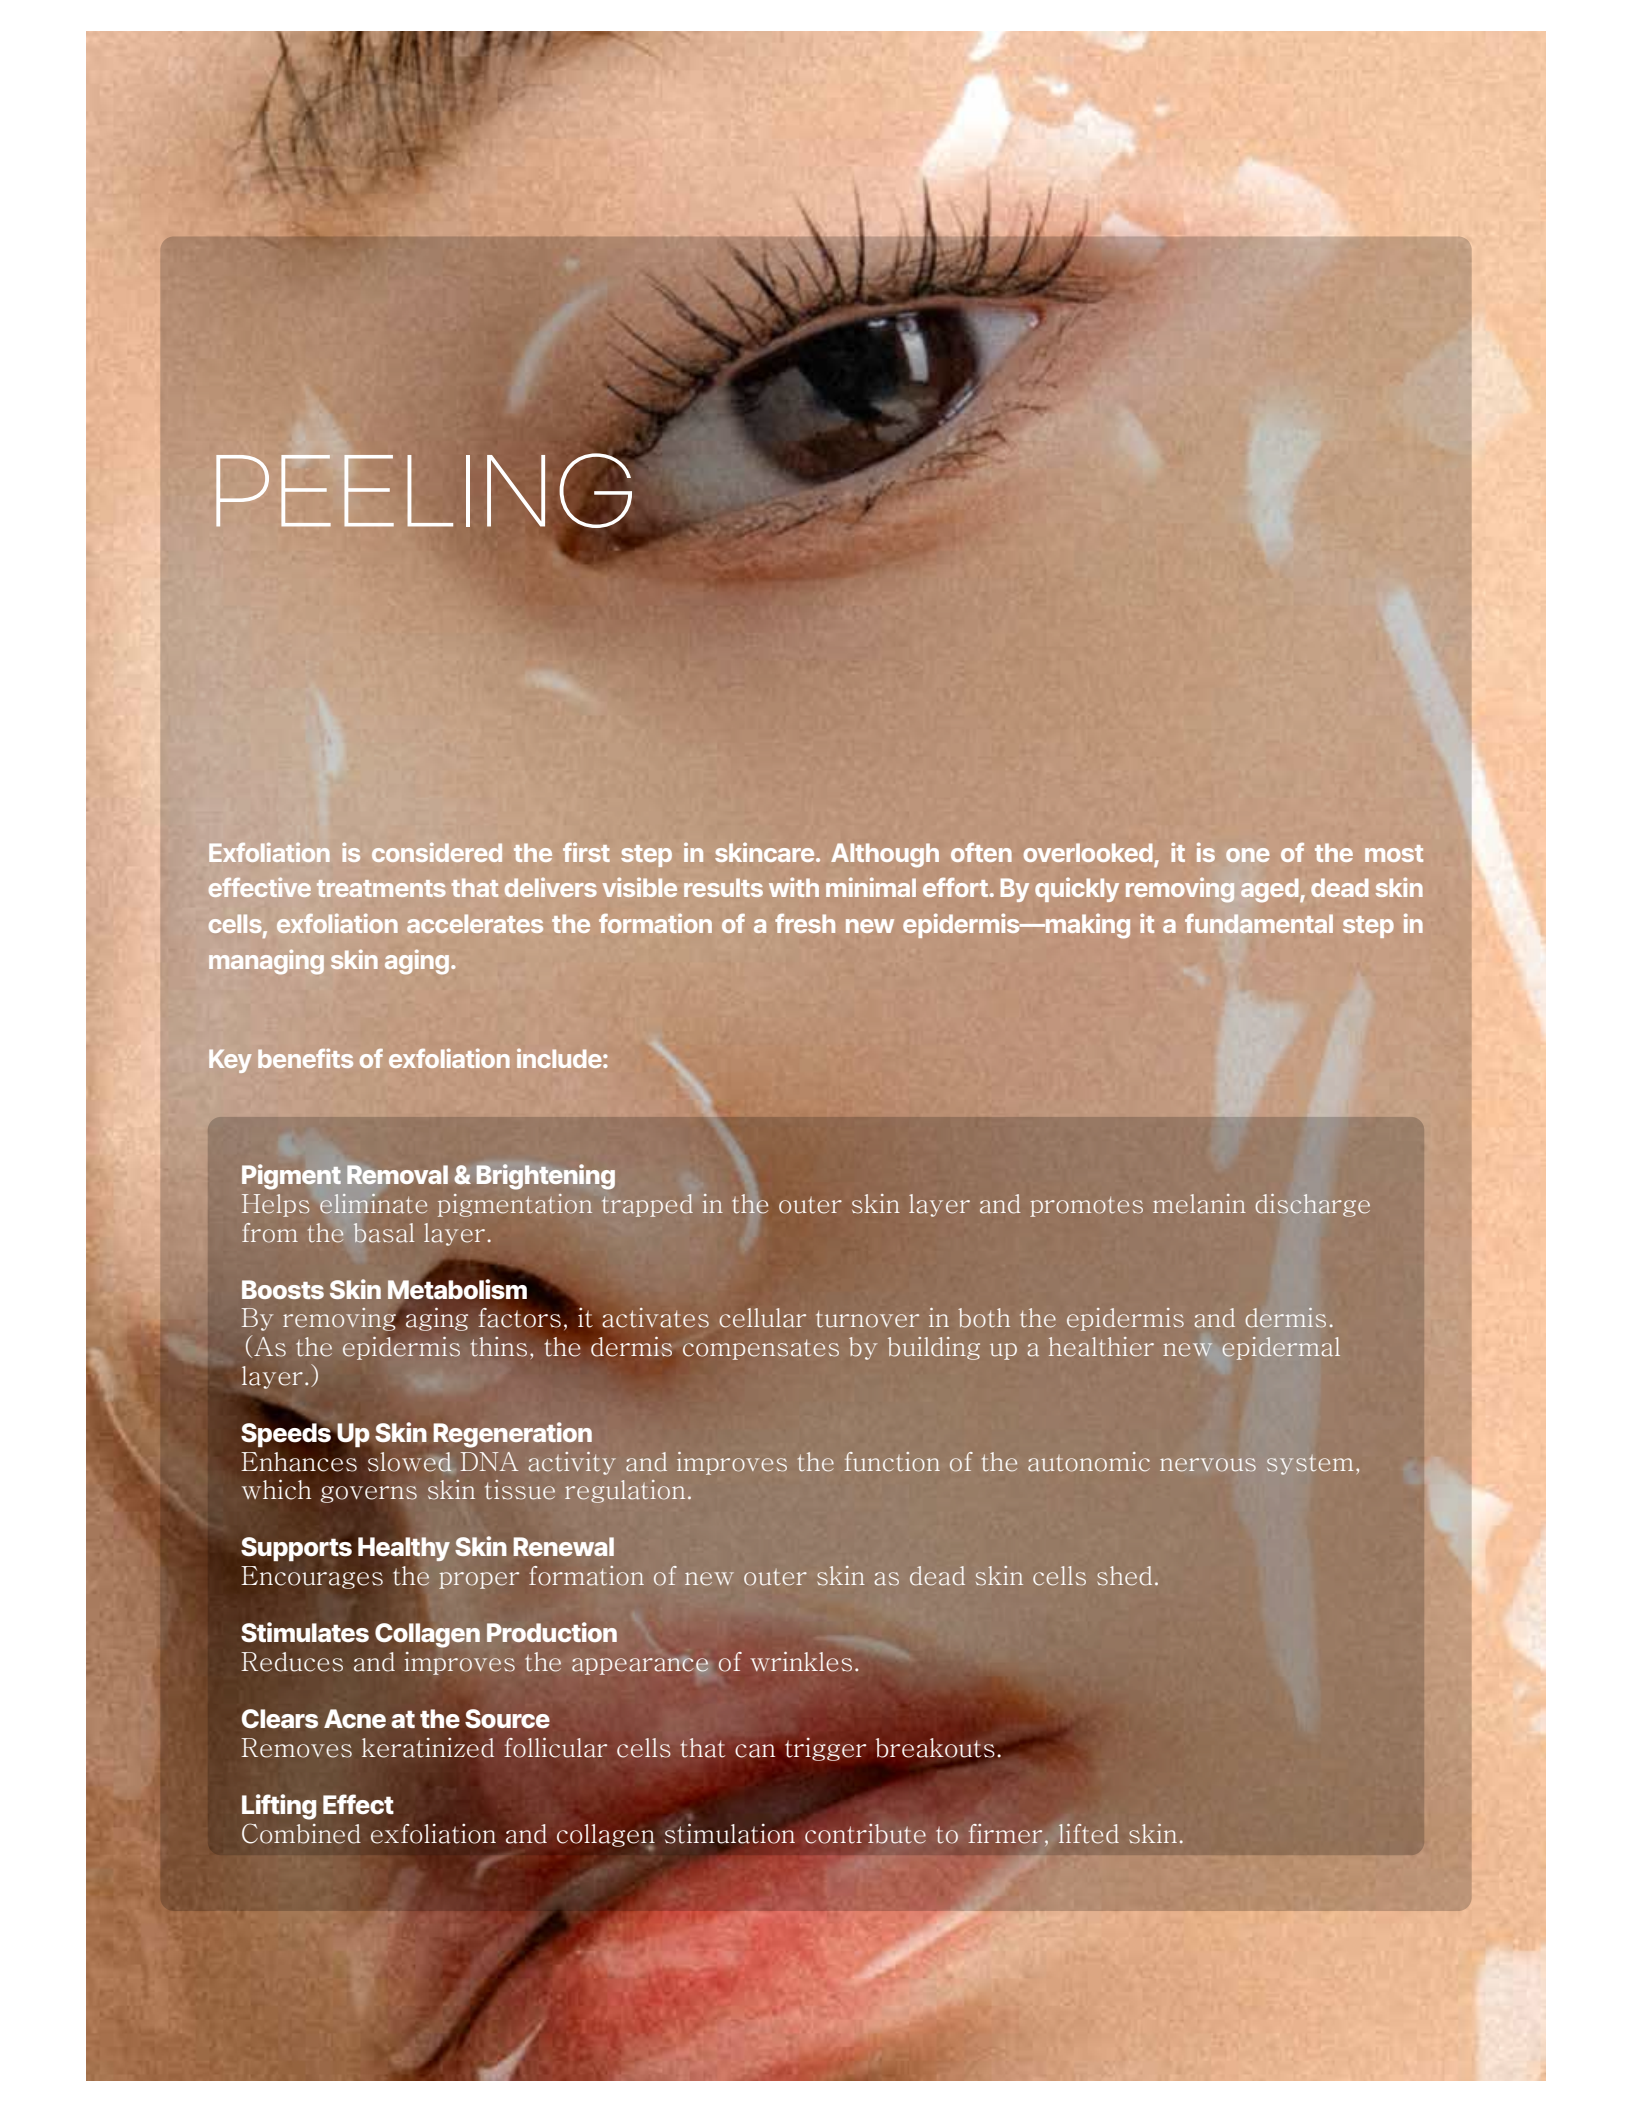

Vitality and radiance

Inhibits melanin synthesis to brighten skin tone and enhance glow

LAMI PEEL

DM.^{Cell}

A close-up photograph of a person's face, focusing on the eye and cheek area. The skin is being treated with a peeling process, where white, flaky dead skin cells are being removed, revealing smoother skin underneath. The word "PEELING" is overlaid in large, white, sans-serif capital letters on the left side of the image.

PEELING

Exfoliation is considered the first step in skincare. Although often overlooked, it is one of the most effective treatments that delivers visible results with minimal effort. By quickly removing aged, dead skin cells, exfoliation accelerates the formation of a fresh new epidermis—making it a fundamental step in managing skin aging.

Key benefits of exfoliation include:

Pigment Removal & Brightening

Helps eliminate pigmentation trapped in the outer skin layer and promotes melanin discharge from the basal layer.

Boosts Skin Metabolism

By removing aging factors, it activates cellular turnover in both the epidermis and dermis. (As the epidermis thins, the dermis compensates by building up a healthier new epidermal layer.)

Speeds Up Skin Regeneration

Enhances slowed DNA activity and improves the function of the autonomic nervous system, which governs skin tissue regulation.

Supports Healthy Skin Renewal

Encourages the proper formation of new outer skin as dead skin cells shed.

Stimulates Collagen Production

Reduces and improves the appearance of wrinkles.

Clears Acne at the Source

Removes keratinized follicular cells that can trigger breakouts.

Lifting Effect

Combined exfoliation and collagen stimulation contribute to firmer, lifted skin.

Program

LAMI PEEL

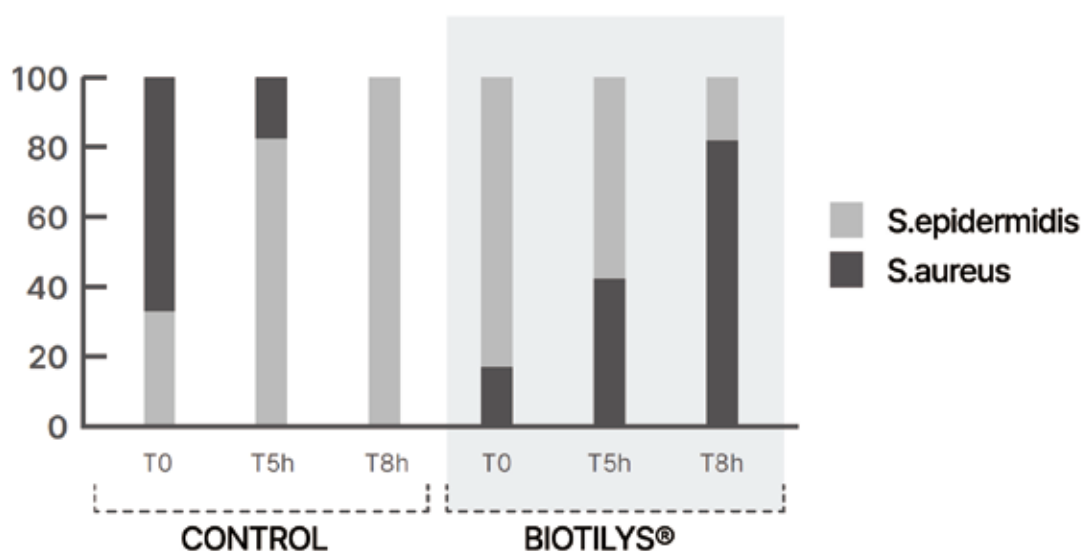

A next-generation lifting and peeling treatment that strengthens the skin's core and restores balance through the powerful combination of Microbiome, Resveratrol, Peptide Complex, and key ingredients like PHA, LHA, and AHA

"Developed from the research stage to be safe even for thin and highly sensitive skin. Not only does it deeply cleanse pores, but it also promotes lifting, firmness, radiance, and skin regeneration"

BIOTILYS®

There are approximately 1,000 species-level microorganisms residing on the skin. These microbes are closely related to the condition of our skin, immunity, and the health of the skin barrier. BIOTILYS® helps **maintain the balance of beneficial bacteria in the skin, supporting the balance of the skin barrier and assisting in addressing fundamental skin issues** such as persistent acne, psoriasis, atopic dermatitis, and eczema.

The balance of *S. aureus* and *S. epidermidis* in the skin microbiome

Resveratrol

It is a polyphenolic compound produced by plants to protect themselves from harmful environmental factors such as fungi and pests. Recently, it has gained attention for its benefits to skin health. It inhibits skin glycation, **promotes collagen production, and effectively removes reactive oxygen species, making it excellent for anti-aging.**

LAMI PEEL

**An optimized peeling formula
with low irritation and high efficacy**

PHA

Hydrate & Nourish

Mandelic acid, glycolic acid, and lactic acid gently exfoliate the skin's surface, improving pigmentation and fine lines. They also promote collagen production in tissue.

AHA

Hydrate & Nourish

This gentle, water-soluble formula exfoliates softly and absorbs slowly, making it ideal for sensitive skin. It hydrates, prevents collagen loss, and provides an instant lifting effect.

LHA

Collagen Boost & Protection

A 4th-generation BHA derivative with a gentle pH of 5.5, it protects the skin barrier and slowly penetrates to repair sun-damaged, photoaged skin.

Peptide complex targeting all skin layers

EGF (Epidermal Growth Factor)

Supports epidermal regeneration and elasticity

FGF (Fibroblast Growth Factor)

Penetrates deeper than EGF to enhance elasticity

PGF (Plant-derived Placenta Peptide)

Dermal-regenerating growth factors

KGF (Keratinocyte Growth Factor peptide)

Enhances the stratum granulosum barrier and prevents epidermal wrinkles

Palmitoyl Tripeptide-5

Targets horizontal forehead and crow's-feet wrinkles

Palmitoyl Prolyl Tripeptide-56 Acetate

Industry's first peptide targeting vertical wrinkles

Program

LAMI PEEL

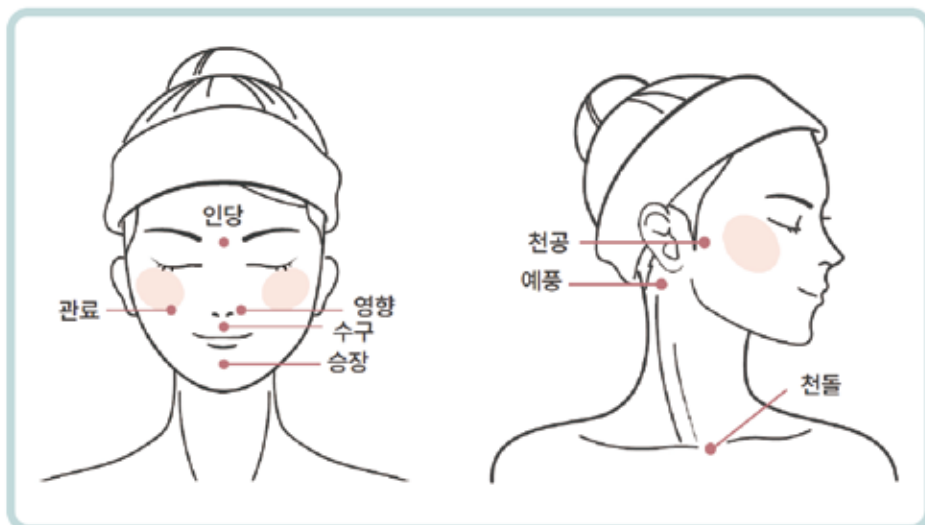

DM.Cell's 18 skin-activating extracts

BB 18-EX™

Formulated with a **highly concentrated blend of medicinal herbs** extracted through DMcell's advanced 8-step extraction process, this product helps soothe inflammation, calm the skin, brighten the complexion, and provide anti-aging benefits.

Witch Hazel Leaf Water, Provence Rose Flower Water, Aloe Vera Leaf Juice, Tea Tree Leaf Water, Centella Asiatica Extract, Houttuynia Cordata Extract, Cucumber Extract, Ginkgo Biloba Leaf Extract, Scutellaria Baicalensis Root Extract, Rosemary Leaf Extract, Burdock Root Extract, Safflower Seed Extract, Spanish Licorice Root Extract, Green Tea Extract, Purslane Extract, Ginger Extract, Ginseng Callus Culture Extract, Myrothamnus Flabellifolia Callus Culture Extract (Rose of Jerico Extract)

Enhance the lifting effect with brush techniques

For enhanced results, use a brush to perform lymphatic massage and stimulate acupressure points while applying the first and second formulas

Apply along the hairline and work into the scalp

AMPOULE

Hyaluronic Therapeutic Skin Renewal Serum

Hyaluronic acid with high purity, double low molecular weight, and high concentration, deeply moisturizes dry skin. It is a functional ampoule that supplies powdered nutrients. Low-molecular-weight hyaluronic acid prevents dryness inside. MTS is available to be used.

Application method	After arranging the skin texture with toner, take an appropriate amount of the product, apply it along the skin texture, and let it absorb lightly. MTS is available to be used.
Active Ingredients	Double Sodium Hyaluronate, Aloe Sap, Marine Collagen, Western Rose Sap
Applied skin	All skin, dry skin, sensitive skin, inelastic skin
Volume	5ml*6pcs/1set
Price	

Program

Hyaluronic Moisture

Hyaluronic Therapeutic Serum with low-molecular, high-concentration hyaluronic acid to target inner dryness.

#InnerDryness #DamagedSkinRecovery #PowerfulHydrationAmpoule

Low-molecular hyaluronic acid

Low-molecular hyaluronic acid deeply absorbs into the skin, attracting 300-1000 times its weight in moisture, aiding collagen synthesis, and providing intense hydration and skin barrier support.

Program

Hyaluronic Moisture

Gentle ampoule with natural plant-based ingredients, free from irritation

Provence rose oil

Powerful antioxidant effects of vitamin A and C in rose leaves

Tea tree oil

Tightens pores, controls sebum & reduces inflammation

Acmella

Spirantol boosts tired skin, revitalizing and improving skin tone

Chamomile

Controls excess sebum and soothes sensitive skin

Applicable Skin

Moisture-depleted oily skin

Inner dryness

Makeup flaking, rough, dry skin.

EGF 3% Regeneration Program

DM.^{Cell}

EGF

A component that penetrates epidermal cells and acts on the cell nucleus to promote the rate of cell division and proliferation in epidermal cells.

Wrinkle improvement effect

Rapid generation of new cells → Keratinization and shedding of aged cells → Increase in total number of skin cells → Regeneration of collagen and elastic fibers → Enhanced skin elasticity → Reduction in wrinkles

EGF's skin brightening effect

Increased proportion of new skin cells → Decreased melanin-producing and pigmented cells → Improvement in hyperpigmentation and dark spots.

The moisturizing effect of EGF on the skin

Stimulates the synthesis and secretion of extracellular hyaluronic acid and macromolecules → Skin becomes more hydrated and moisturized.

The effect of EGF on skin tone

Enhanced metabolism of dermal vascular endothelial cells → Increased capillary density → Improved blood circulation in the skin → Brighter, healthier, and more radiant complexion.

The decline of EGF slows down the skin's turnover cycle!

After the age of 25, the skin's levels of EGF (Epidermal Growth Factor) begin to decline. As a result, cellular metabolism and regeneration capabilities gradually decrease, leading to the formation of wrinkles. While the skin turnover cycle of healthy, youthful skin is approximately 28 days, after the age of 25, this cycle slows down to 4–6 weeks. This delay in skin cell regeneration thickens the stratum corneum, accelerating visible signs of aging. Long-term use of skincare products enriched with EGF has shown remarkable effectiveness in addressing these aging symptoms. By supplementing the diminishing growth factors that naturally decrease with age, EGF helps maintain the skin's elasticity and smoothness, effectively preventing wrinkles and sagging that typically occur over time. This allows women to retain a more youthful, vibrant complexion, regardless of age.

Program

EGF 3% Regeneration Program

Self-Renewal Care Enhances the skin's self-recovery ability, promoting the production of vital, resilient proteins

Firmness & Elasticity Care Supports skin elasticity and calms stressed, damaged skin

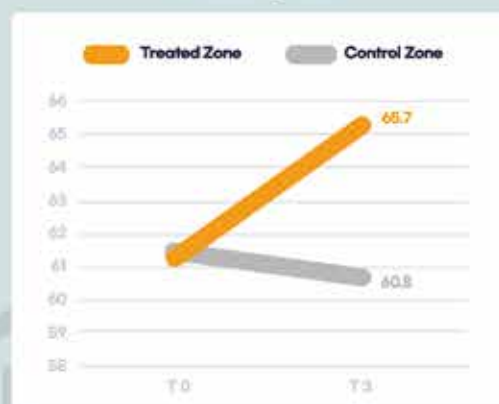

Deep Nourishment Hydrates deeply while activating enzymes and nourishing the skin from within

Melanin (Pigmentation) Test

Elasticity Test

DM. cell EGF Serum 3-Week Clinical Test Results:

Reduction in melanin content, increased skin elasticity

Program

EGF 3% Regeneration Program

60 min

Why choose a trio of peptides?

The synergistic power of EGF, FGF, and TGF

The secret lies in their synergistic boost!

The absorption depth into the skin varies depending on the type of growth factor.

To see a clear anti-aging effect, using EGF, FGF, and TGF together will provide maximized synergy.

EGF

Epidermal Growth Factor (EGF) is a growth factor that promotes cell proliferation and activity in the outermost layer of the skin, helping to improve aging signs, wrinkles, and other skin concerns.

FGF

Excellent effects on anti-aging, skin whitening, and wound healing! According to research, administering EGF and TGF together shows greater results.

TGF

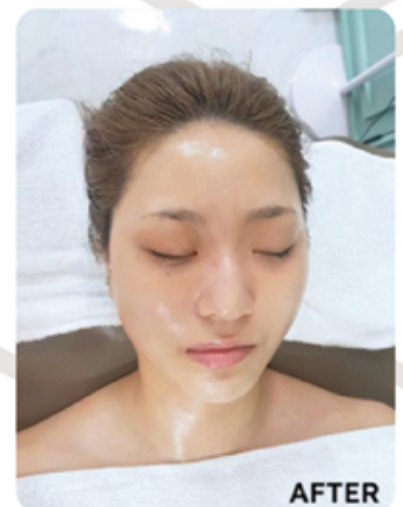

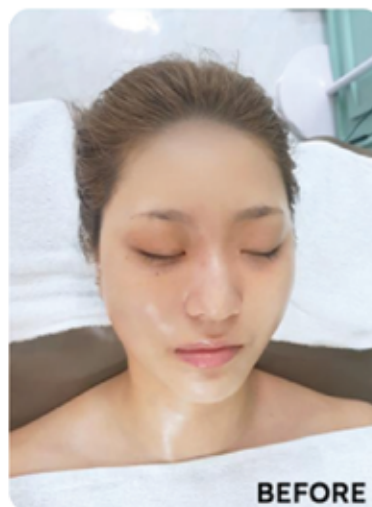

It plays a role in the production of collagen and elastin, which make up the dermis, promoting the production of healthy cells and helping to strengthen the skin barrier and improve skin elasticity.

Applicable Skin

Skin losing elasticity
Dull and dry skin that feels tight
Skin in need of barrier repair
Dark and uneven skin tone
Who wants to experience effects of EGF

Expected Effects

Sebum control
Glowing skin
Bacteria removal
Pigmentation removal

3% EGF Skin Renewal Serum

This regenerating and brightening ampoule contains nicotinoyl octapeptide-9, a peptide that helps prevent melanin production and reduce the effects of epidermal growth factor. It targets dullness, uneven skin texture, and dark spots, promoting a clearer and more transparent complexion.

Application method	After arranging the skin texture with toner, take an appropriate amount of the product, apply it along the skin texture, and let it absorb lightly. MTS is available to be used.
Active Ingredients	EGF 3% , Nicotinoyl Octapeptide-9 (2%), Panthenol, Water-soluble Collagen, Water-soluble Elastin, Beta Carotene
Applied skin	All skin, immunocompromised skin, sensitive skin, damaged skin
Volume	5ml*6pcs & 60ml

9GF ANTI-AGING BTX PROGRAM

DM.^{Cell}

9GF ANTI- AGING

Radiant skin, V-line lifting

9GF BTX Essence is a high-concentration essence (for wrinkles and whitening), formulated with 9GF (KGF, EGF, FGF, HGF, TGF, etc.), ginseng stem cells, resurrection plant stem cells, and highly concentrated, high-content medicinal ingredients like Seoseo-okyong-san liquid. It is a cutting-edge product designed for powerful anti-aging effects during MTS treatments. This complex ampoule neutralizes harmful oxygen in the skin, revitalizes collagen structures in the dermis, brightens pigmented cells to assist with whitening, improves fine lines, and rapidly transforms the skin texture to provide younger, firmer skin.

The synergy effect of growth factor combinations

As aging occurs on our skin and scalp, it's not just one growth factor that declines. All of them decline together, so using a combination of growth factors that support each other can lead to better results than supplementing just one. DMCell strives for the most powerful skin regeneration with an optimal combination of peptides.

What is the difference between growth factors and peptides?

Both are structures where amino acids are linked, but peptides are short linear structures with fewer than 10 amino acids, while growth factors are long 3D structures with more than 50 amino acids linked together.

Program

9GF ANTI- AGING

BB 18-EX™ DMcell's patent, a powerful skin activation agent

Acetyl Hexapeptide-8

A peptide used as an alternative to Botox, it reduces the appearance of fine lines and wrinkles caused by facial muscle contractions.

SH-polypeptide-62 (HGF)

Secreted by mesenchymal cells in various tissues, it circulates through the bloodstream and plays a crucial role in the regeneration of epidermal and endothelial cells in need of repair. It helps in collagen regeneration, synthesis promotion, and wrinkle improvement.

SH-oligopeptide-1 (EGF) Epidermal cell regeneration factor

SH-polypeptide-3 (KGF)

A key growth factor that regulates the differentiation and growth of keratinocytes, which make up the stratum corneum. It promotes the division and epidermalization of skin tissue during the wound healing process, enabling the final stages of wound recovery.

SH-polypeptide-22 (TGF)

TGF-beta 1 is a growth factor that acts on various types of cells to regulate cell division, differentiation, and physiological activity. The action of TGF-beta 1 growth factors is known to be enhanced in the presence of TGF-alpha. It plays a crucial role in promoting tissue regeneration and recovery through various growth factors and cytokines during the wound healing process in the skin and scalp.

SH-polypeptide-11

It stimulates the keratinocytes and fibroblasts that make up the skin, promoting skin regeneration and restoring healthy skin. It enhances the division and growth of keratinocytes, stimulates fibroblasts, and promotes the synthesis of ECM components like collagen, fibronectin, and elastin, thereby preventing wrinkles and providing powerful anti-aging effects.

Copper Tripeptide-1

It helps with skin regeneration, elasticity, anti-aging, and preventing aging. Additionally, it aids in promoting new hair growth and reducing and inhibiting hair loss. Copper peptides are beneficial for both the skin and scalp, and are often used together with other growth factors such as HGF and IGF.

Acetyl Hexapeptide-11

It improves skin elasticity and firmness, helps reduce the appearance of wrinkles and fine lines, and promotes the production of collagen and elastin.

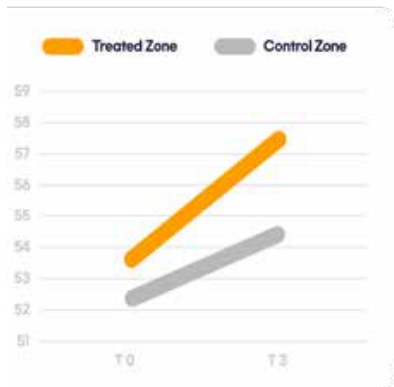

Acetyl Tetrapeptide-5

It changes the microcirculation of the skin and increases the osmotic pressure of body fluids, effectively improving moisture retention, swelling, and dark circles.

After 3 Weeks

9GF BTX Complex Essensit

It is an anti-wrinkle functional ampoule that contains natural Botox ingredients to firm up sagging skin due to weakened collagen layer and at the same time improve wrinkles to make them look smooth.

Application method After arranging the skin texture with toner, take an appropriate amount of the product, apply it along the skin texture, and let it absorb lightly. MTS is available to be used.

Active Ingredients Cooper Tripeptide-1, Acetyl Hexapeptide-8, Acetyl Tetrapeptide-5, Acetyl Tetrapeptide-11, Sh-polypeptide-62, Paradox-25, D-Mela 12

Applied skin All skin, dry skin, sensitive skin, inelastic skin

Volume 10ml*5pcs / 1Box

Program

Magic Matrixle Combi-System

It is a treatment that improves skin with loss of elasticity and many wrinkles, relieving even deep crow's feet caused by aging. It helps define facial contours, improving pores and wrinkles.

The DM Cell MTS Matrixle Combo System boosts natural collagen regeneration and enhances absorption of active ingredients through micro-needling. With peptides like Hexapeptide-3 and Pentapeptide-3, it suppresses wrinkle-causing hormones for visible anti-aging effects. Using ultra-fine needles (0.25mm), MTS stimulates collagen production, improving wrinkles, pores, acne scars, pigmentation, and even hair loss. This safe, non-invasive treatment promotes skin renewal by restructuring dermal tissue, leaving skin clearer, firmer, and healthier.

Program

Magic Matrixle Treatment

It is a treatment that improves skin with loss of elasticity and many wrinkles, relieving even deep crow's feet caused by aging. It helps define facial contours, improving pores and wrinkles.

Albumin Powder

Prevents skin roughness through antioxidant action.

Silk Protein

Helps improve skin elasticity and prevents fine lines. Provides vitality by softening and smoothing the skin texture, while delivering deep hydration for a moisturized complexion.

Acmella oleracea extract

Provides immediate relief from skin dryness, helps prevent further dehydration, and reduces the appearance of fine lines and wrinkles.

Soluble Collagen

Uses proteins similar to those found in the human body, offering high biocompatibility and delivering beneficial effects

Applicable Skin

Wrinkle improvement and lifting
Sensitive skin
Enlarged pores

Matrixl Treatment Powder Kit

This face mask tackles wrinkles and sculpts a sharper V-line for a more youthful appearance. Natural extracts act as firming agents, visibly smoothing even deep wrinkles in the skin's lower layers. A potent blend of collagen and collagen-boosting ingredients plumps and supports the skin. Beta-glucan, a powerful antioxidant, helps reverse signs of aging, while albumin brightens the complexion. Experience immediate lifting, wrinkle reduction, and a radiant glow.

Application method	Take 1 powder and 1 solution in a glass ball, mix and apply thinly on the face with a pack brush. Leave it for 15 minutes and spray enough PLS on the hardened mask. Wipe off with a damp sponge after 2 minutes.
Active Ingredients	Albumin Powder, Silk Protein, Acmeila Extract (natural Botox)
Applied skin	For all skin types, for saggy skin
Volume	Powder 12pcs + Solution 100ml
